Documents:

Document 1: JP 01-009803 A (Sumitomo Chemical Co., Ltd.),

13 January 1989

Document 2: JP 03-153523 A (Kao Corp.), 01 July 1991

Explanation:

The inventions that are set forth in claims 1-18 are disclosed in document 1; therefore, they lack novelty and do not involve an inventive step. The production methods are the same; thus, it is thought that the characteristics of the porous metal oxide flakes that are obtained will also be the same. It is indicated that that the flakes are useful as a starting material for a cosmetic, a filler for various industrial substances, or the like; however, such applications are merely design matters.

In addition, the inventions that are set forth in claims 1, 4 and 6-16 are disclosed in document 2; therefore, they lack novelty and do not involve an inventive step. It is indicated that the flakes are useful as a carrier for a pigment, and it is merely a design matter to apply the flakes as a starting material for a Cosmetic, fillers for various industrial substances, or the like.

VII.	Certain	defects	in the	international	application
4 YY*	Certain	ucicus	III CHE	IHECT HUCHAN	application

The following defects in the form or contents of the international application have been noted:

Claim 18 cites the "method for producing porous metal oxide flakes that is set forth in claim 11."

However, claim 11 pertains to a "coating composition."
